Agenda

Agenda

**Business
Problem**

Data

Methods

**Modeling &
Results**

**Proposals
& Future
Considerations**

How Can We Engage Users?

Track user's
emotional state from
their audio

Data Understanding

Emotions in Data Set

Data Preparation Method

Modeling & Results

Convolutional
Neural Network

5 Emotional Classes

10 Epochs

74% Accuracy

Loss of 0.7696

Class Performance

Sleepiness F1 = 84%

Neutral F1 = 59%

Recommendations

- Animate user avatar faces
- Target less satisfied users
- Special offers to keep users engaged for longer

Future Considerations

- Update with User Audio
- More Accents
- More Languages
